Subject Index

A

Acquired immune deficiency syndrome, *see* AIDS
AIDS, nutrition and the gastrointestinal tract in, 281
AIDS-related complex, zinc-depleted, effects of zinc on immune status of, 259
Alanine metabolism, glucose versus xylitol effects on, 109
Alkali-soluble protein, muscle, in persistent post-operative infection, 237
Amino acids, branched chain, in nutrition of surgical patients with sepsis, 61
Anorexia in cancer patients, 35
Anorexia nervosa, cell-mediated immunity in, 253
Apolipoprotein E polymorphism and the removal of remnants of triglyceride-rich lipoproteins in carbohydrate-rich diets, 127
Arvid Wretlind Lecture, Espen (1988), 115
Audit of parenteral nutrition, 1

B

Bacterial infections, acute, intravenous clearance of intravenous fat emulsions, 141
Blood culture detection of septicaemias in cancer patients during parenteral nutrition, 191
Body composition, effects of non-protein energy source in parenterally fed weanling rats on, 49
BOOK REVIEWS
- APPELT, G.D. and APPELT, J.M., Therapeutic pharmacology, 277-8
- CARPENTER, K., The history of scurvy and vitamin C, 113
- DI TORO, R. (ed.), Review of nutritional support for sick children, 278
- DI TORO, R. (ed.), Nutrition in preventive paediatrics, 278
- ENDRES, J., and ROCKWELL, R., Food, nutrition and the young child, 59
- ESCOTT-STUMP, S., Nutrition and diagnosis related care, 221
- FRANCIS, D., Diets for sick children, 59
- HUGHES, C., The additives guide, 60
- HUI, Y.H., Handbook of enteral and parenteral feedings, 277
- JENSEN, T.G., ENGLERT, D.M. and DUDRICK, S.J. Nutritional assessment, 60
- LONGREE, K. and ARMBRUSTER, G. Quantity food sanitation, 113
- POSKITT, E.M.E. Practical paediatric nutrition, 277
- SORENSON, J.R., Biology of copper complexes, 114

C

Cancer
- experimental, skin anergy in, influence of nutritional status, 247
- patients with
  - anorexia in, 35
  - malnourished, marginally, predictability of deterioration, 203
  - muscle carnitine pools in, 341
  - oesophageal, pre-operative parenteral nutrition in, 23
  - septicaemias in, during parenteral nutrition, 191
  - surgical, *see* Surgery

Carbohydrate-rich diets, triglyceride-rich lipoproteins in, removal of remnants of, 127
Cardiac muscle, effects of glucose-insulin-potassium infusion on glycogen levels in, 213
Carnitine
- muscle, *see* Muscle
- supplementation in TPN, effects
  - adverse, in critically ill, 83
  - on free fatty acids in persistent post-operative infection, 151

Catheter sepsis rate, 187
Cerebral function, effects of parenteral nutrition in liver cirrhosis patients on, 321
Cirrhosis, liver, *see* Liver cirrhosis
Computerized program for TPN, 217
Concanavalin A, lymphocyte responses to, in anorexia nervosa, 253

Critically ill/seriously ill/intensive care patients
folic acid deficiency in, supplementation regimens with, 69
high dose carnitine supplementation of parenteral nutrition in, adverse effects in, 83
oxygen consumption in, assessment, 89
riboflavin deficiency associated with outcome of, subclinical, 269

D

Dextrose-electrolyte-trace element preparation in prolonged TPN, effects and adequacy, 313

E

Electrolyte(s), muscle, in persistent post-operative infection, 237
Electrolyte-dextrose-trace element preparation in prolonged TPN, effects and adequacy, 313
Emulsion, fat, *see* Fat/lipid emulsions
Emulsion mixtures, nutritional
factors affecting stability, 167
plasticizer migration into, prevention, 173
Energy
non-protein source, in parenterally fed weanling rats, effects, 49
resting expenditure
in isolated head injury and spontaneous intracranial haemorrhage patients, 347
various predictive formulae for estimation of, comparison of, 299
Enteral nutrition, percutaneous cervical pharyngostomy for, 273
Erythrocyte deformability in surgical patients under TPN, 95

F

Fat
oxidation in critically ill patients, adverse effects of high dose carnitine supplementation of parenteral nutrition on, 83
utilisation, glucose and, during simultaneous IV glucose and lipid emulsion administration, interrelationship, 337
Fat/lipid emulsions, *see also specific emulsions*
common clinical chemical analyses and the effects of, 79
intravascular metabolism, 115
intravenous, *see* Intravenous administration
medium-chain triglyceride-based, clinical and experimental effects, 223
Fatty acids, free, in persistent post-operative infection, effects of carnitine supplemented TPN on, 151
Folic acid deficiency in intensive care patients, supplementation regimens with, 59

G

Gastrointestinal tract and nutrition in AIDS, 281
Glucose
circulating levels, effects of parenteral nutrition in liver cirrhosis patients on, 321
intravenous infusion
metabolic and cardiovascular effects, 135
with fat emulsion, glucose and fat utilisation during, interrelationship between, 337
with insulin and potassium, effects on glycogen levels in rat muscle, 213
urea synthesis and alanine metabolism in rats and the effects of, 109
utilisation, fat and, during simultaneous intravenous glucose and lipid emulsion administration, interrelationship, 337
Glycogen levels in rat muscle, effects of glucose-insulin-potassium infusion, 213
Growth, effects of non-protein energy source in parenterally fed weanling rats on, 49

H

Haemorrhage, spontaneous intracranial, resting energy expenditure in patients with, 347
Head injury, isolated, resting energy expenditure in patients with, 347
Heart muscle, effects of glucose-insulin-potassium infusion on glycogen levels in, 213
Home
intravenous nutrition, trace element preparation in, 307
parenteral nutrition, *see* Parenteral nutrition
Hormones, circulating levels, effects of parenteral nutrition in liver cirrhosis patients on, 321

I

Immune status in zinc-depleted AIDS-related complex, effects of zinc on, 259
Immunity, cell-mediated, in anorexia nervosa, 253
Infections, *see also* Sepsis; Septicaemia
acute bacterial, intravenous clearance of intravenous fat emulsions, 141
lack of increased risk of, in anorexia nervosa, 253
persistent post-operative, effects of carnitine supplemented TPN on free fatty acids in, 151
Insulin-glucose-potassium infusion, effects on glycogen levels in rat muscle, 213
Intracranial haemorrhage, spontaneous, resting energy expenditure in patients with, 347

Intralipid
intravenous infusion, metabolic and cardiovascular effects, 135
removal from plasma of uraemic and intensive care patients, 145
Intravenous administration/infusion
fat emulsions
glucose and, simultaneous, glucose and fat utilisation during, interrelationship between, 337
metabolic and cardiovascular effects, 135
plasma clearance, in acute bacterial infection, 141
thoracic duct lymph in dogs and the effects of, 75
glucose, *see* Glucose
peripheral, 289
Intravenous nutrition
central versus peripheral, in perioperative period, 179
home, trace element preparation in, 307
utilisation of peripherally-administered, 289

L

Lipid emulsions, *see* Fat/lipid emulsions
Lipoproteins
triglyceride-rich, in carbohydrate-rich diets, removal of remnants of, 127
Liver cirrhosis
parenteral nutrition in patients with, effects on circulating glucose and hormone levels and cerebral function, 321
protein in, minimal requirements, 329
Lymph, thoracic duct, in dog, effects of intravenous administration of fat emulsion, 75
Lymphocyte responses to concanavalin A in anorexia nervosa, 253

M

Malnourished cancer patients, marginally, predictability of deterioration, 203
Malnourished rats, microsomal enzymes in, rehabilitation with oral refeeding, 101
Medium-chain triglyceride-based fat emulsions, clinical and experimental effects, 223
Microsomal enzymes in malnourished rats, rehabilitation with oral refeeding, 101
Muscle
alkali-soluble protein–water–electrolytes in persistent post-operative infection, 237
carnitine
in cancer patients, 341
in persistent post-operative infection, 237
function, in pre-operative patient, measurement, 161
glycogen levels in, effects of glucose-insulin-potassium infusion on, 213
skeletal, *see* Skeletal muscle
utilisation of free fatty acids, in persistent post-operative infection, effects of carnitine supplemented TPN on, 151

N

Nitrogen
balance, minimal protein requirements in liver cirrhosis determined by measurements of, 329
total urinary, calculation from urea urinary nitrogen, 45
Nutrient solutions in peripheral parenteral nutrition, phlebitis incidence with different, 181

O

Oesophageal cancer patients, pre-operative parenteral nutrition in, 23
Oral refeeding in malnourished rats, microsomal enzyme rehabilitation with, 101
Oxygen consumption in the critically ill, assessment, 89

P

Parenteral nutrition
audit of, 1
home
effect on patients' lifestyle, 11
liver cirrhosis patients, in,
effects on circulating glucose and hormone levels and cerebral function, 321
multicentre survey in Europe, 3
long term/prolonged
dextrose-electrolyte-trace element preparation in, effects and adequacy, 313
organ changes in pigs after, 29
malnourished rats, in
microsomal enzyme rehabilitation with, 101
oesophageal cancer patients, in
pre-operative, 23
peripheral, 289
phlebitis incidence, 181
total
carnitine supplemented, *see* Carnitine
computerized program for, 217
dextrose-electrolyte-trace element preparation in, effects and adequacy, 313
Perioperative period, central versus peripheral intravenous nutrition in, 179
Pharyngostomy, percutaneous cervical for enteral nutrition, 273
Phlebitis in peripheral parenteral nutrition, incidence, 181

Plasma clearance of intravenous fat emulsions, 141, 145
Plasticizer migration into nutritional emulsion mixtures, prevention, 173
Platelet aggregation in surgical patients under TPN, 95
Potassium-insulin-glucose infusion, effects on glycogen levels in rat muscle, 213
Protein
  dietary content, effects on weaning from ventilators, 207
  in liver cirrhosis, minimal requirements, 329
  muscle alkali-soluble, in persistent post-operative infection, 237
  oxidation in critically ill patients, adverse effects of high dose carnitine supplementation of parenteral nutrition on, 83
  turnover in skeletal muscle, effects of non-protein energy source in parenterally fed weanling rats on, 49

R

Resting energy expenditure, *see* Energy expenditure
Riboflavin deficiency, subclinical, outcome of seriously ill patients associated with, 269

S

Sepsis, *see also* Infections
  after surgery, branched chain amino acid nutrition in patients with, 61
  with catheters, 187
  experimental, organ sequestration of ^{65}Zn during, 263
Septicaemias in cancer patients during parenteral nutrition, 191
Seriously ill, *see* Critically ill
Skeletal muscle
  glycogen levels in, effects of glucose-insulin-potassium infusion on, 213
  protein turnover, effects of non-protein energy source in parenterally fed weanling rats on, 49
Skin anergy in experimental cancer, influence of nutritional status, 247
Surgery, *see also* Perioperative period
  cancer patients before
    oesophageal, parenteral nutrition in, 23
    prognostic ability of nutritional assessment methods in, 197
  major, elective nutritional support after, 15
  platelet aggregation and erythrocyte deformability with TPN after, 95
  sepsis after, branched chain amino acids nutrition in patients with, 61
  skeletal muscle function in patient before, measurement, 161

T

Thoracic duct lymph in dog, effects of intravenous administration of fat emulsion, 75
Total parenteral nutrition, *see* Parenteral nutrition
Trace element preparations, *see also* Minerals
  in home intravenous nutrition, 307
  with dextrose and electrolytes, in prolonged TPN, effects and adequacy, 313
Triglyceride-based fat emulsions, medium-chain, clinical and experimental effects, 223
Triglyceride-rich lipoproteins in carbohydrate-rich diets, removal of remnants of, 127

U

Urea, glucose versus xylitol effects on synthesis of, 109
Urea urinary nitrogen, total urinary nitrogen calculated from, 45
Urinary nitrogen, total, calculated from urea urinary nitrogen, 45

V

Ventilators, effects of dietary protein content on weaning from, 207

W

Water, muscle, in persistent post-operative infection, 237

X

Xylitol effects on urea synthesis and alanine metabolism in rats, 109

Z

Zinc
  effects on immune status in zinc-depleted AIDS-related complex, 259
  radioactive [^{65}Zn], organ sequestration during experimental sepsis, 263
